1. The following is an examiner's statement of reasons for allowance. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

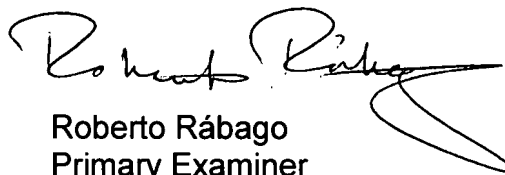

The claims are not anticipated or rendered obvious over the documents cited on the International Search Report because the process has been amended to clearly include steps directed to the making of vinyl polymer by ATRP, followed by dehalogenation at 140-250°C. Furthermore, the process must include either intramolecular cyclization or heating at 140-250°C in the presence of an inorganic adsorbent. This combination of features is not disclosed in the cited references. Furthermore, in view of the distinct polymer structures and reactivities, no motivation can be found for combining process features from the various reference disclosures to emerge with the claimed process.
